Dear Tjalling,

Thank you very much for sending me the report by Klein which I already superficially read through. Needless to tell you that I am very much interested in it. I shall try to formulate any criticisms that may come up.

Would it be possible to produce charts indicating the "explanations" of the various series; that would greatly facilitate my task.

I am arranging to exchange publications both with the Centraal Bureau voor de Statistiek and with the Centraal Planbureau.

Enclosed I am sending you two more offprints; unfortunately I have none left of my article in Weltwirtschaftliches Archiv "Zur Theorie der langfristigen Entwicklung", W.A. 55(May 1942) page 511. In that paper I dealt with some simple theories of trend-movements based on a Douglas' production function and a simple population law. I tried to confront my results with some other variations on trend between 1870 and 1914.

Thank you also very much for your data on town-building in connection with atomic bombs.

Tine, the children and myself were extremely glad with the precious parcels you sent us. All in it satisfies very urgent needs.

With best personal regards,
Yours,

Dr. Tj. Koopmans,
