Dear Professor Leontief,

From my publication for the Central Bank of Venezuela you will have understood how important I think your investigations in the capital structure of the American economy are, also to our own research in development problems. This also applies to the work done by your group of the Harvard Economic Research Project, in the field of input-output studies generally.

I do hope that you will be able to continue and to extend this work in the future.

Yours very sincerely,

(Prof. Dr J. Tinbergen)
