Dear Colleagues,

Thank you very much for sending me Cooks' book and, in particular, for the proofs of your own study, which I shall read carefully and before long. I am sending you separately some of the offprints you asked me for and I want to apologize for the fact that they are not complete. Needless to say that I recommend myself for your comments.

Thanking you once more for the beautiful presents you made me and for the good time we had in Luxembourg,

I am,

yours very sincerely,
