This is to testify that Prof. Dr. G.M. PAJALA
worked at the Central Planning Bureau during the
months of his stay in the Netherlands and gave
particular attention to long-term planning
and monetary and national-accounting problems.

The Director,

(J. Tinbergen)

PROF. DR J. TINBERGEN

THE HAGUE 2 September 1953
Sijzenlaan 41

I herewith declare that Dr C.M. PALVIA worked on his thesis on "An Econometric Model for Development Planning" during the academic year 1952/53. He had to study mathematical techniques and to co-ordinate and reshape many statistical investigations in order to arrive at his econometric model for development planning. He showed great interest and developed a great activity by which he succeeded in finishing his dissertation within the course of that year. I very much appreciate his co-operative spirit and the human approach of his work.

(Professor of Econometrics
at the Netherlands School
of Economics, Rotterdam)
