Miss Jennifer Forsyth,
Palais des Nations,
Geneva

Dear Miss Forsyth,

Thank you for sending me back the maps. As to your questions the answers are the following:

1. yes;
2. imports below 1% are represented by the blanks, whereas the names of the countries with a percentage between 1 and 15 or 20 are underlined;
3. in this map too the percentages refer to the share of the United States, Great Britain and Germany in total imports from the three countries again. The blanks for France, Spain and the Netherlands East Indies are due to the fact that each of the three percentages is below 40; they must therefore have been almost equal;
4. this map refers to all imports, not only the commodities considered in the other maps; the year of reference is 1928.

Yours very sincerely,

(J. Tinbergen)

Dear Miss Forsyth,

Thank you for sending me back the maps. As to your questions the answers are the following:

1. yes;
2. imports below 1% are represented by the planks, whereas the names of the countries with a percentage between 1 and 15 or 20 are underlined;
3. in this map too the percentages refer to the share of the United States, Great Britain and Germany in total imports from the three countries again. The planks for France, Spain and the Netherlands East Indies are due to the fact that each of the three percentages is below 10; they must therefore have been almost equal;
4. this map refers to all imports, not only the commodities considered in the other maps; the year of reference is 1928.

Yours very sincerely,

(J. L. Timmergen)
