Professor Ragnar Frisch,
Universitetets Sosialøkonomiske
Institutt,
Karl Johans Gate 3.
O s l o.

My dear Frisch,

Back in Holland I want to thank you once more for the splendid days I had in Oslo. I think it was extremely pleasant and useful. I have the feeling to have learned very much both about your work and mine and about Norway's practical problems. Please, give my thanks also to Haavelmo and your collaborators.

With this letter I am sending you the first of a few notes I am preparing (as you will probably also do) in order to consolidate the results of our discussions. Other ones will follow therefore. In annex I I tried to formulate in my own words what seems to me to be the essence of your index number proposal. Before passing this to Idenburg I would like very much to have your comments. Annex II tries very shortly indeed to summarize the question we discussed the last evening in the country.

As soon as I have got back my notes (which are in the famous "case" with printed matter you have sent on for me) I shall re-write my memorandum using the new notation adopted by the "World Conference".

As to the letter we already agreed, I think, on sending the results to Koopmans; I wonder whether it would not be good to send them to Stone and to address the letter for Koopmans at the same time to Marschak.

With all good wishes,

yours very sincerely

Professor Hans J. ...

Back in Holland I want to thank you for the
for the splendid days I had in Oxford. I think it was
pleasant and useful. I have the feeling to have learned very
much from your work and from the atmosphere of the
Institute. I also give my thanks to the staff and your
collaborators.

With this letter I am sending you the first of
a few notes I am preparing for you with a view to
order to coordinate the results of our discussions. Other
will follow thereafter. In annex I have included in my
own words what seems to me to be the essence of your
remarks. I have tried to be as clear as possible in
my presentation. I have also included in my notes
what I think to be your comments. I think it is very
important to summarize the discussion we discussed the last
time in the country.

As soon as I have finished my notes (which are in
the French text) with which I have sent you the first
I shall re-write my summary in English. I shall also
include the French text of the notes.

As to the last part of the notes, I think on
reading the results of the discussion I have sent you
be able to read them in French and to give the English
translation of the French text.

With all good wishes,

Yours very sincerely
