

4 August 1954

Professor Ferdinando di Fenizio,
L'Industria,
Via Farneti 8,
Milan

Dear Professor di Fenizio,

Thank you very much for yours of July 29. I certainly have seen the first part of the translation and I think the printing was very well done. I have not the slightest wish left and I am completely satisfied. I should like to repeat my thanks for all the trouble you gave yourself; you will understand what a pleasure it is for me to have the chance directly to address an Italian public in this way. My impression is that Italy is among the first countries to have developed several of the statistics and more complicated instruments of modern analysis, and I am looking forward to receive your recent publication.

With best personal regards,

yours very sincerely,

Milan

Dear Professor di Fenizio,

Thank you very much for yours of July 29.
I certainly have seen the first part of the translation
and I think the printing was very well done. I have not
the slightest wish left and I am completely satisfied.
I should like to repeat my thanks for all the trouble you
gave yourself; you will understand what a pleasure it is
for me to have the chance directly to address an Italian
public in this way. My impression is that Italy is among
the first countries to have developed several of the
statistical and more complicated instruments of modern
analysis, and I am looking forward to receive your recent
publication.

With best personal regards,

Yours very sincerely,
