

PROF. DR J. TINBERGEN

THE HAGUE, 18 August 1953
Sijzenlaan 41

Professor Ragnar FRISCH
Universitetets Socialøkonomiske
Institutt
Karl Johans Gate 47
OSLO

My dear Frisch,

Many thanks for yours of August 15 and for the memoranda you promised me. I did not understand from your former letter that you worked out the case where a matrix of lags is given. This indeed I think I never saw before or elsewhere and it is certainly not in Leontief's book. I shall decidedly try to follow this when I get your lectures.

I am also sorry that there is no chance for me to see you at Paris on September 15 or thereabout, since I am leaving for the US on September 10 and probably the last few days will be rather busy. Otherwise I would have enjoyed such a possibility very much and I do hope that some time after January you will pass another time or we will find another opportunity. There certainly would be some interesting topics to discuss; for my part I tried to develop our theory of economic policy (if I may call this ours) for the case of decentralised policy (a number of countries or a number of pressure groups). I hope to send you some notes on it which I am preparing in the next few weeks.

Cordially yours,

PROF. DR. J. TIMMERMAN
